

## LUXURY LIVES IN THE DETAILS

If you've struggled with weight gain, and exercise and diet just haven't given you the dramatic transformation you'd like, the VASERlipo® liposuction system can help. VASERlipo can sculpt and shape multiple areas in a single procedure, including:

- Jowls, chin and neck
- Abs, hips or love handles
- Male and female breasts
- Arms
- Back, buttocks or thighs
- Knees, calves or ankles

## ADVANCING THE ART OF LIPOSUCTION

- Exceptional body contouring
- Enhanced skin retraction compared to traditional liposuction, delivering smooth results
- Treat multiple areas in a single procedure
- Less pain, swelling and downtime than traditional liposuction
- Immediate and precise sculpting vs. non-invasive treatments

PRECISE ULTRASOUND-ASSISTED LIPOSUCTION

PRECISE ULTRASOUND-ASSISTED LIPOSUCTION

Model; not an actual patient.

# REDEFINING YOUR FUTURE

## HOW IT WORKS

During a VASERlipo procedure, the area to be treated is filled with a medicated solution. The fat cells are then treated with state-of-the-art ultrasound energy and are removed from the body through a gentle suction process. The surrounding tissues are left intact, giving you the smooth contours you want with less pain and recovery time than traditional liposuction.

### INDICATION

VASERlipo® is used to break up and remove fatty tissue for aesthetic body contouring. VASERlipo is also used in the following surgical specialties for the removal of soft tissues:

- Neurosurgery;
- Gastrointestinal and Affiliated Organ Surgery;
- Urologic Surgery;
- Plastic and Reconstructive Surgery;
- General Surgery;
- Orthopedic Surgery;
- Gynecologic Surgery;
- Thoracic Surgery; and
- Laparoscopic Surgery.

### IMPORTANT SAFETY INFORMATION

- Do not undergo VASERlipo® treatment if you have chronic medical conditions, such as obesity, diabetes, blood clotting disorders, heart, lung, or circulatory system disease, vascular (blood vessel) problems, or circulation or blood clotting problems that have been found to occur with certain medications. Talk to your doctor if you have any of these conditions.
- The following conditions may also cause issues with the safety or effectiveness of VASERlipo®:
  - Presence of collagen, scarring, or connective tissue disorders
  - Presence of stretch marks or potential for stretch mark formation
  - Lupus Erythematosus
  - Endocrine disorders
  - Pregnancy, or the possibility of pregnancy
- VASERlipo® will not produce significant weight loss.
- Common immediate side effects may include pain, bruising, swelling, uneven appearance, and numbness. The most common adverse events include scar tissue, blood clots, and thermal burns. Talk to your doctor for more information about VASERlipo®.

Solta Medical is a global leader in the aesthetic industry providing innovative products such as Liposonix® VASERlipo®, VASER® ultrasonic systems, Thermage® radio frequency and Isolaz® acne therapy systems, and the Clear + Brilliant®, Clear + Brilliant pëlo® and Fraxel® lasers.

## UNPRECEDENTED PRECISION BODY SCULPTING

An alternative to the harsh techniques of traditional liposuction, VASERlipo® is unique in its ability to target fat while leaving other important tissues intact. It's minimally invasive yet powerful enough to eliminate large areas of fat, and gentle enough to treat more delicate areas.

## LESS TRAUMA, SWELLING, PAIN, AND DOWNTIME COMPARED TO TRADITIONAL LIPOSUCTION

## REFINE YOUR LOOK

A step-up from non-invasive procedures that rely on secondary reactions to reduce small amounts of fat over an extended time, VASERlipo removes visible amounts of fat immediately with minimal downtime.
